PROFESSIONAL SUMMARY

Junior **Information Systems** student at UNLV, minoring in **Computer Science**, with hands-on experience across **C++**, **Java**, and **x86/MIPS Assembly**, plus **full stack web development** and **API integration**. Experienced in **object-oriented design**, **recursion**, and **data structures**. Strong background in **team leadership** and collaboration using **GitHub/Discord**. Interested in working across the stack, from low-level systems to deployed web applications.

TECHNICAL SKILLS

- C++
- x86-64 MIPS
- HTML / CSS
- Supabase
- Cloudflare
- IntelliJ IDEA
- VS Code
- Linux Terminal
- Data Structures
- Java
- JavaScript
- SQL
- PostgreSQL
- Git /GitHub
- CLion
- WSL
- OOP
- Algorithms

LEADERSHIP AND SERVICE EXPERIENCE

Recruiting & Retention Officer, AFJROTC - Liberty High School. Organized engagement events and led retention initiatives, building teamwork and communication skills. Coordinated virtual events to sustain participation during the pandemic.

LANGUAGES

Spanish: Native / Bilingual
English: Native / Bilingual

Jacob Martinez

EDUCATION

Expected in May 2028

Bachelor of Science in Business Administration, Information Systems
Minor in Computer Science
University of Nevada, Las Vegas

Relevant Coursework:

CS 135: Computer Science I (C++)
CS 202: Computer Science II (C++)
CS 218: Assembly Language
IS 210: Java Programming
BUS 281: Web Development
IS 372: Info Management Research Methods & Tools (Python)

PROJECTS

Buffered File Word Search (x86-64 Assembly)

Wrote a **word search utility** entirely in **x86-64 assembly**, called from a thin C++ driver

Implemented a **buffered file reader from scratch** using Linux syscalls, with a refill routine that correctly stitches words split across buffer reloads

Recursive Maze Solver (x86-64 Assembly)

Translated pseudocode into assembly, correctly **preserving registers across recursive calls** with a proper prologue and epilogue

Implemented **integer to string conversion** via repeated division, with no library support

Library Management System (Java, Team Project)

Took initiative in **leading a 5-person team**, **assigning roles**, **mentoring peers**, and coordinating via **GitHub** and **Discord**

Designed and implemented **core classes** with **OOP principles** for **book management and search**

Delivered a **functional console-based system** while guiding teammates through **version control** and **collaboration workflows**

Portfolio Site (JavaScript, Supabase)

Built a **dynamic, database backed portfolio site** using **Supabase** for all project data, including detail pages, real code excerpts, and a searchable tag system

Built individual project detail pages that **dynamically** pull long-form write-ups, code excerpts, and captured **terminal output** directly from each project's own source repository
